

2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

The departmental team ensures teaching learning across the institute is carried out in an efficient and effective manner. The students are encouraged to learn new things from the curriculum and co-curricular activities. In the student-centric approach for teaching, teachers become facilitators for the students. Inviting experts/people of eminence to deliver lectures is also adopted in teaching practices. The students are constantly encouraged to participate in symposiums, seminars, workshops organized in and outside the institute.

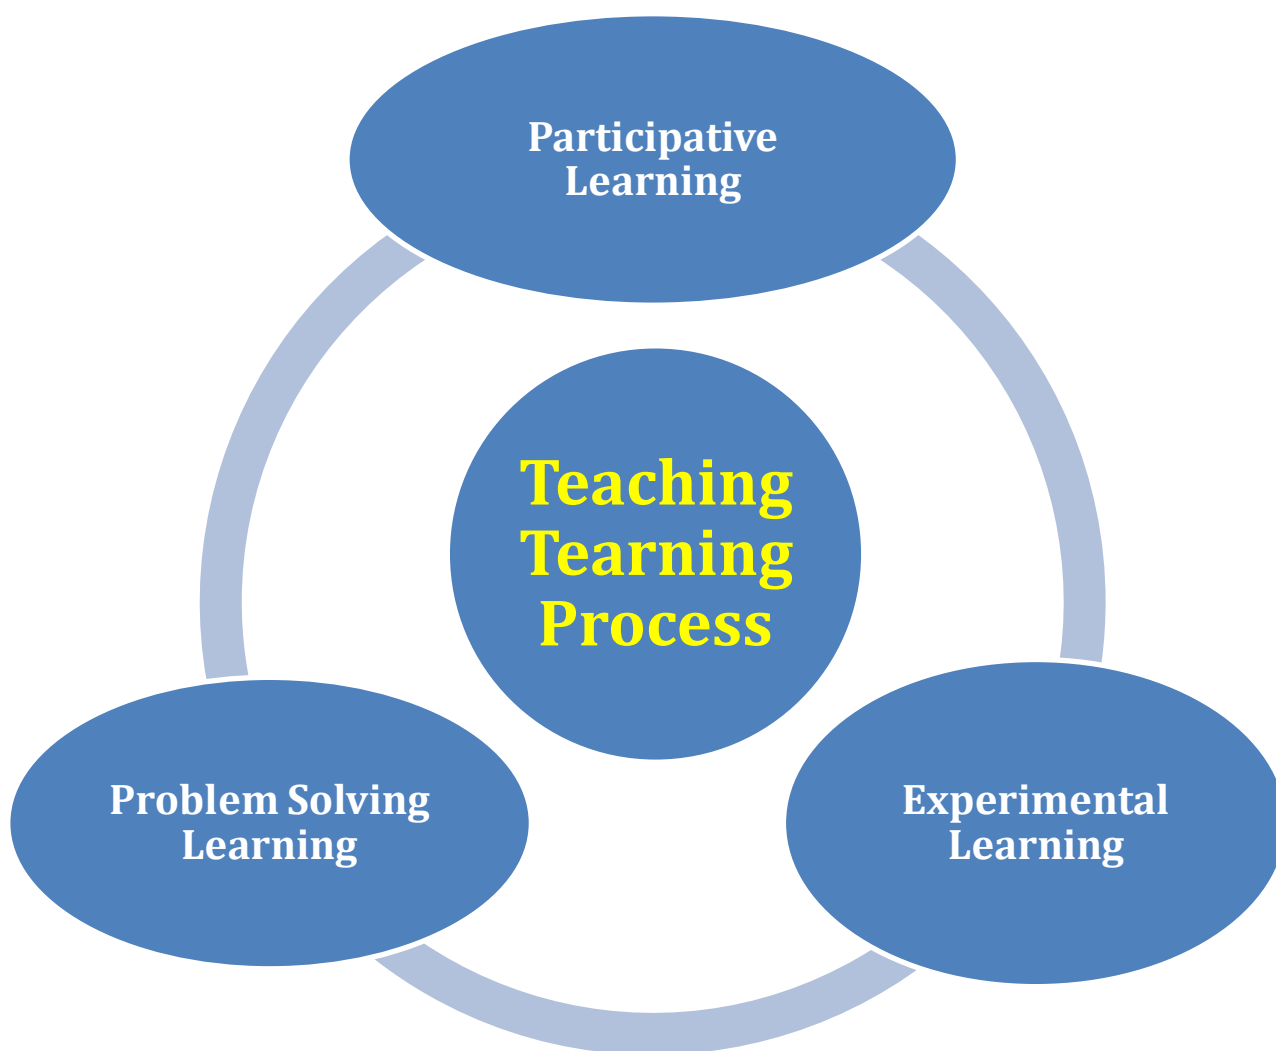

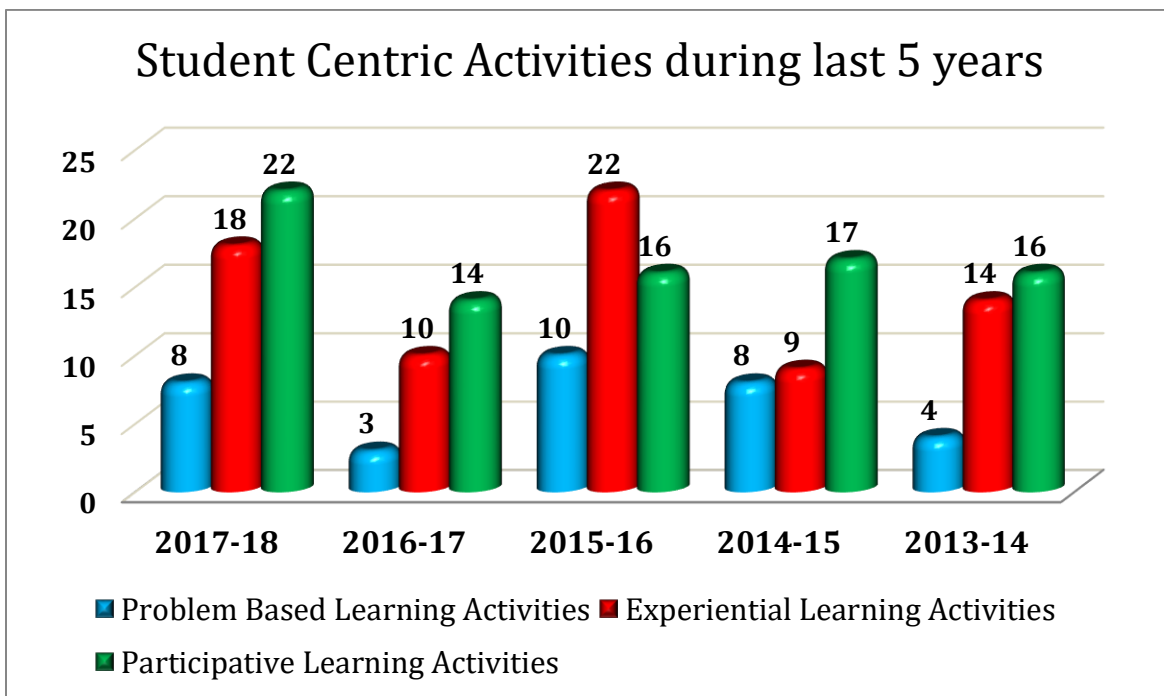

Fig.: Student Centric Teaching Learning Process in the Institute

Table: Student Centric Activities Conducted in the Institute

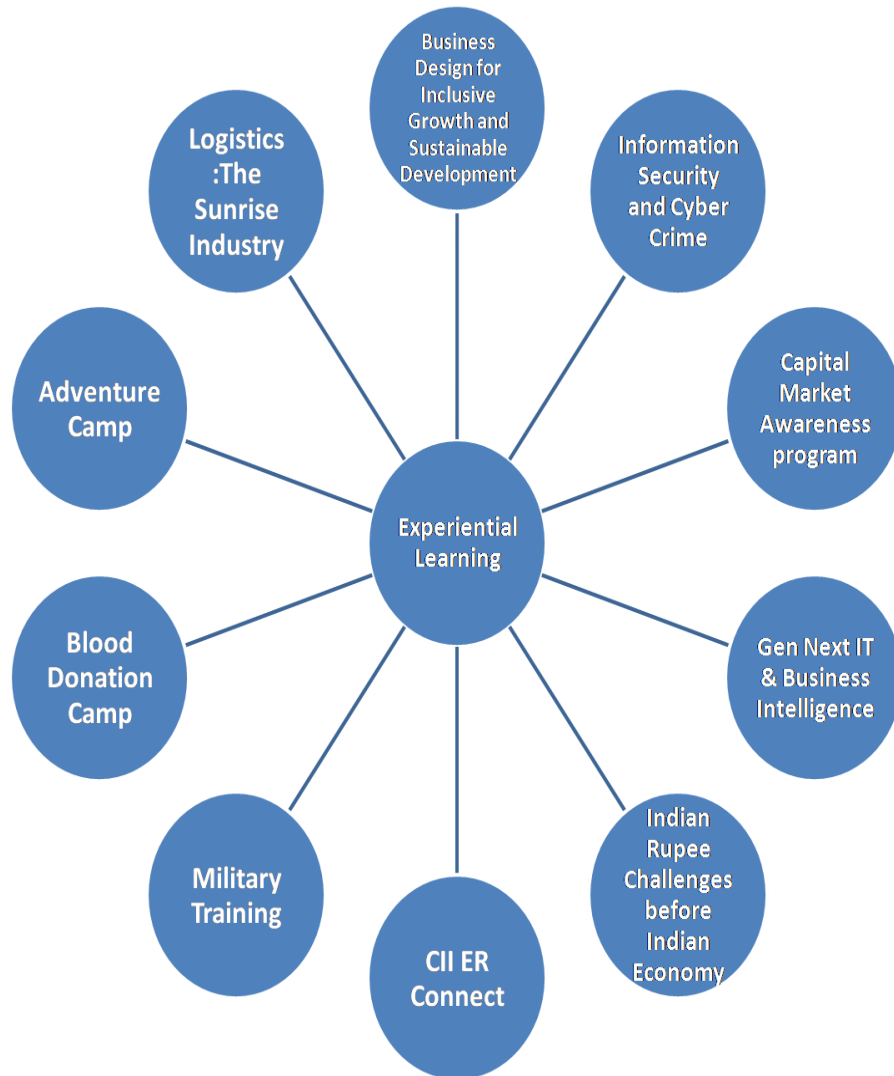

Academic Year	Problem Based Learning Activities	Experiential Learning Activities	Participative Learning Activities
2017-18	8	18	22
2016-17	3	10	14
2015-16	10	22	16
2014-15	8	9	17
2013-14	4	14	16
